INDUSTRIAL AIR FILTRATION LEADERS

Design – Fabrication – Installation – Expertise

AQUEST PROJECT BULLETIN

OIL MIST ELIMINATOR

AQUEST CORPORATION provided an aerospace components manufacturer in Massachusetts with several CNC machine-mounted coolant mist collectors to control machining mist in their facility. The Quest-Air OM units are low cost, highly efficient mist and smoke collectors designed specifically to provide 500 cfm of suction for a single CNC machine. The units are equipped with a 1st stage centrifugal separator, a 2nd stage baffled impinger, and a 3rd stage 99.98% efficient membrane filter. The highly efficient system provides superior filtration, while offering unsurpassed cost effectiveness in terms of up-front investment and replacement filter costs. The Quest-Air OM eliminates oil mist issues, and reduces maintenance headaches.
