AQUEST PROJECT BULLETIN

CLAMP SEAL DUCTWORK

AQUEST CORPORATION provided an extensive kit of clamp seal ductwork, as well as installation services for a new non-woven fabric process line in Rhode Island. Aquest utilized smooth-seamed, rolled-lip, clamp-seal ductwork to complete this very complicated ventilation system design in a tight schedule. The clamp-seal ductwork components clamp together in seconds without welds, bolts, screws, flanges, special tools or precise measurements. In general, clamp-seal ductwork has been shown to cut installation time by more than 40%! Once the ductwork is installed, the user can quickly and easily take apart sections to clean and/or reconfigure the layout. The properly specified and installed ductwork ensures that the system performs as intended.
