## INDUSTRIAL AIR FILTRATION LEADERS

Design – Fabrication – Installation – Expertise

### AQUEST PROJECT BULLETIN

### FOOD-GRADE DUST COLLECTOR

AQUEST CORPORATION utilized numerous food-grade versions of the MicroAir RP-1 *Twister* at a food manufacturer in CT. The stainless steel units were equipped with wash-down motor and electronics and washable polyester filters. The units allowed the manufacturer to removed several old, large, non-NFPA-complaint and inefficient centralized dust collectors from their facility. The *Twister* is a versatile 1,000 cfm cartridge collector, which fully complies with NFPA combustible dust standards by adhering to the *less than 8 cu. ft. volume rule*, and returns exhaust air back into the building. Aquest worked with the manufacturer to win significant energy rebates and incentives from the State, plus realizing significant and on-going reduction in their energy bill.

CALL TODAY TO DISCUSS OUR OFFERING  
OF BEST AVAILABLE CONTROLS FOR  
YOUR UNIQUE AIR QUALITY CONCERN.
